About Me

B.Tech student with strong foundations in programming and AI concepts. Skilled in Python and web development, with hands-on experience building intelligent productivity tools and code analysis systems. Passionate about solving real-world problems through technology.

Projects

1.Resume Analyzer

- ◆ Developed an AI-based resume analysis tool to evaluate resumes and provide structured feedback.
- ◆ Implemented keyword extraction and skill matching to compare resumes with job descriptions.
- ◆ Built using Python and NLP techniques to improve resume optimization

2.Smart Student Task Agent Manager

- ◆ Built a productivity-focused task management system for students.
- ◆ Implemented features like task categorization, deadline tracking, and priority-based reminders.
- ◆ Designed user-friendly UI to improve engagement and usability.
